ABOUT ME

I am a data professional specializing in data collection, analysis, and process automation. I leverage R, Python, SQL, Tableau, and Qualtrics to transform raw data into actionable insights. For the last three and a half years I've worked as a Business Intelligence Analyst specializing in E-commerce digital retail environments. Before that, I was a Data Specialist for the Utah State Board of Education, working closely with colleagues to administer Child Nutrition Programs. I have more than 7 years' experience working with data in R and Excel, 6 years in Tableau, 5 years in Qualtrics, and 2 years in Python and SQL environments. To see examples of my work, visit: jaredmwalker.github.io.

EMPLOYMENT

BUSINESS INTELLIGENCE ANALYST INDEPENDENT CONTRACTOR

2022 – PRESENT

- Customize and maintain e-commerce environments using platforms such as Shopify, Wix, and Squarespace, etc.
- Execute data extraction and descriptive and predictive analytics using Python and R.
- Transform raw transactional data into intuitive Tableau visualizations, empowering leadership to make data-driven decisions.

DATA SPECIALIST

2019 – 2022

UTAH STATE BOARD OF EDUCATION

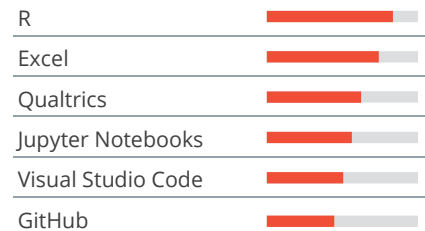

- Advanced reporting architecture by integrating SQL queries, R automation, Tableau visualization, and task scheduling into a unified analytics workflow.
- Developed reproducible R pipelines for data ingestion, transformation, and statistical analysis, reducing manual processing and error rates.
- Collaborated with colleagues to design and administer surveys, including instrument development with Qualtrics and subsequent data extraction.
- Designed Tableau dashboards to support internal reporting and public-facing data transparency initiatives.
- Led statistical enhancements to outlier detection reports, improving methodological rigor and interpretability.
- Maintained standard operating procedures to ensure compliance with state and federal regulatory requirements.
